

# Swep Duo r-SafetyPlus Pro

Double-sided mop made from up to 35% recycled material on the microfibre pile side

## Product Description

Swep Duo r-SafetyPlus Pro is a double-sided mop with one scrubbing side for loosening dirt and one microfibre side with a unique 3-D honeycomb pile structure that offers **high dirt pick-up capacity and adaptability to uneven surfaces.**

Swep Duo r-SafetyPlus Pro is a symmetrical mop suitable for dry, damp and wet cleaning processes. It is designed to be used as a pre-prepared system in all areas with double-sided cleaning capacity of > 40m<sup>2</sup>.

It has unmatched durability – machine washable up to 250 times and has been awarded the prestigious Nordic Swan Ecolabel that ensures it meets stringent environmental, quality and health standards.

## Application

Swep Duo r-SafetyPlus Pro is a perfect solution for safety floors as its scrubbing side is ideal for loosening dirt and its microfibre side offers high dirt pick-up.

## Advantages

- ✓ Double-sided mop with one scrubbing side for loosening dirt and one microfibre side for dirt collection
- ✓ Made from up to 35% recycled material on the microfibre pile side
- ✓ Up to 99.99% bacteria removal tested with P.aeruginosa & S.aureus on vinyl surfaces at a third party lab
- ✓ High durability up to 250 washes
- ✓ Awarded the Nordic Swan Ecolabel
- ✓ Recognized by ErgoCert as part of an ergonomic system when used with Swep r-Frame and either the Telescopic Handle or r-Ergonomic Handle

- ✓ Colour coded tags and numbered finger loops for mop side indication with arrow for mopping direction
- ✓ Double-sided, cost effective, less mops to buy, wash and use

## Washing recommendation

Recommended washing conditions: 60°C. Maximum washing temperature: 95°C. Avoid high alkalinity and strong bleaching activity (do not use chlorine bleach). Tumble dry at low heat.

## How to use

### Mop preparation in the washing machine:

- ✓ Take mops out of machine, fold them once or lay them flat with the finger loop on top and put them in the box
- ✓ Prepare mops by adding cleaning detergent in the last rinsing process

### Manual mop preparation:

- ✓ Prepare the cleaning solution in a bucket
- ✓ Fold mops once or lay them flat with the finger loop on top, and put them in the box
- ✓ Put sieve on box and pour the cleaning solution evenly inside
- ✓ Let the solution distribute evenly into the mops

### Continue with the cleaning process (pre-prepared method):

- ✓ Take the mops by finger loop out of the box, put it on the frame
- ✓ Adjust telescopic handle to correct height
- ✓ Start mopping in guided cleaning direction (closed mop side)
- ✓ After use, take away loose dirt particles by brushing the mop
- ✓ Wash the mops
